

A. Content & Audience

1. **Did your peers clearly understand your site's purpose and target audience?** Yes, they were able to clearly understand the purpose of my site as well as who it is for.
2. **What suggestions did they make to improve your site's content or messaging?** Home screen has alot of content but its all smushed together in text blocks so breaking that up with colors or images would be good.

B. Design & User Experience

3. **How did your peers respond to your site's design (layout, color, typography, or organization)?** They said the design was good and the color schema great, but the home page had a lot of text that could be broken up a bit.
4. **Did they find the design effective in communicating your message and engaging users?** Yes, they said it enhanced the site's purpose

C. Functionality & Performance

5. **What issues did your peers identify with features or interactivity on your site?** The tab does not change when I change tabs, and I need to implement my dashboard page, which still needs to be completed.
6. **Did they note any pages or elements that loaded slowly or inconsistently across devices or browsers?** Some of my images and text fonts caused the pages to load a bit slowly. The video's size when the screen size changes could be a bit better.

D. Accessibility & Usability

7. **What feedback did you receive about accessibility (e.g., alt text, color contrast, keyboard navigation)?** The contrast in the footer section is low and should be fixed.
8. **What can you improve to make your site more inclusive and user-friendly?** Contrast the footer better across all pages.

E. Action Plan

9. **What did your peers like most about your site?** They said the features page really stood out, and the overall design was good.

10. What two improvements will you make based on their feedback, and how will you implement them? Making the home screen have fewer text blocks and fixing the contrast in the footer.
